defining the field of research-based breastfeeding education and ethical, evidence-based breastfeeding practice - a non-profit research and educational institution

Lactation Counselor Training Course and CLC® Certification Exam Summer-Fall 2017

The Lactation Counselor Training Course

is a comprehensive, evidence-based, college level, breastfeeding management course that includes practical skills, theoretical foundations and competency verification. Basic and complex issues are explored within the context of problem solving and counseling strategies. This course prepares participants for professional work in the hospital and in public health and community settings. It provides training in gaining insight into clients' problems with a strong focus on clinical and counseling skills.

The Certified Lactation Counselor

(CLC)® is the premier national certification in lactation management for the United States. CLC certification holders have demonstrated competence in the clinical lactation skills, knowledge, and attitudes that are essential to help women succeed. CLCs can provide expertise and counseling about managing optimal and sub-optimal breastfeeding. The CDC refers to CLCs as professional breastfeeding experts who are members of the health care team (2014 Breastfeeding Report Card). Research has shown that the education required of CLCs prior to certification is associated with improved breastfeeding exclusivity and duration. The Certified Lactation Counselor (CLC®) certification is accredited by the American National Standards Institute (ANSI) based on the ISO/IEC 17024 standard.
