The Maternal and Infant Assessment for Breastfeeding and Human Lactation Course utilizes a case study format to develop proficiency in the process of assessment and analysis of the breastfeeding dyad, and to differentiate optimal conditions from those that are sub-optimal, as well as summarize and document the assessment.

Major topics covered in the course are optimal and sub-optimal breastfeeding-related anatomy of mother and infant, normal and abnormal development of the anatomy and physiology of the breastfeeding mother and baby, breastfeeding assessment tools, breastfeeding assessment and the lexicon of breastfeeding and human lactation.
